DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-20 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by “Special Edition Using Microsoft Outlook 2000” (hereinafter Outlook).

Referring to claims 1, 8, and 15, the Outlook reference discloses an activity window in Figure 11.11. In the section immediately above Figure 11.8, the Outlook reference explains that the user can select “New” from the standard toolbar to create or define a new task/activity. Said “New” button corresponds to the claimed define activity button. The form illustrated in Figure 11.8 allows a user to input a subject, a start date, a due date, and status information. Upon entering this information and selecting the “Save and Close” button, the new task/activity is displayed in the activity window as illustrated in Figure 11.11. Figure 11.14 shows another view of the activity window in which the subject, due date, and status information are visible for each task/activity. As supported in the section entitled “Changing the Fields Displayed in a View” (on the page following Figure 38.10), users can customize the view of Outlook items by adding or removing fields. A section from Appendix C lists “start date” as an available field when viewing tasks/activities. Accordingly, users could view the start date, the due date, and status information of a task/activity in the activity window wherein said start date corresponds to the claimed start

data, the due date corresponds to the claimed activity duration data, and the status information corresponds to the claimed status data. Finally, as explained in items 6 and 8 following Figure 11.8, users can determine and select a status for a particular task/activity based on the start data and the duration data.

Referring to claims 2-4, 9-11, and 16-18, the form in Figure 11.8 allows a user to input any text into the subject field. Accordingly, the defined task/activity could inherently be described as a brainstorming, categorization, or voting activity.

Referring to claims 5, 12, and 19, the Outlook reference discloses in Figure 11.18 a message window that is cable of displaying user messages in real time.

Referring to claims 6, 13, and 20, the Outlook reference discloses in Appendix C that Microsoft Outlook maintains a database comprising various tables of information, wherein each table contains many fields that further comprise the information that is visible in Outlook's forms. Accordingly, upon selecting the "Save and Close" button in Figure 11.8, the defined activity is sent to a database as claimed.

Referring to claims 7 and 14, the Outlook reference discloses in Figure 11.17 a dialog box from which a participant can be selected to receive a defined task/activity.

Response to Arguments

Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendments to the specification are acceptable and the corresponding objections have been withdrawn.
